EDUCATION

Rutgers University - New Brunswick, NJ

September 2024 – Present

Bachelor of Science in Computer Science and Mathematics

- Relevant Coursework: Computer Architecture, Systems Programming, Discrete Structures, Mathematical Theory of Probability, Design & Analysis of Computer Algorithms, Principles of Information & Data Management, Data Structures
- Certifications: AWS Certified Cloud Practitioner — In Progress
CompTIA Security+ — In Progress

EXPERIENCE

Institute for Advanced Study

May 2025 – Present

Network Engineering Intern ias.edu

Princeton, NJ

- Support enterprise network and data center infrastructure across multiple layers of the OSI model, working with fiber optics, Ethernet, switches, servers, UPS systems, wireless access points, IPAM, and network services; utilize Icinga and Nagios for server and network monitoring and maintain a PostgreSQL database tracking thousands of fiber strands across campus.
- Lead the installation and replacement of 300+ wireless access points across campus and residential facilities, coordinating deployments with Facilities, troubleshooting SSID, wireless coverage, and connectivity issues, and supporting network switch replacements and infrastructure upgrades.
- Develop Python scripts for network automation and configuration assurance workflows to automate infrastructure configuration, improve network consistency, and reduce manual processes; contribute and review code through GitLab using version control and collaborative software development practices.
- Investigate cybersecurity incidents and network threats, including phishing emails, SMTP authentication attacks, malicious IP activity, and suspicious network traffic, using Plixer and other network observability/NDR tooling to analyze activity and support incident response.
- Perform security audits and reviews of software code, identify potential vulnerabilities and security issues, write structured security finding reports, and create and track corresponding remediation tickets in GitLab while collaborating with the Software Engineering team.
- Provide cross-functional IT and systems support through the RT ticketing system, troubleshooting printers, endpoints, network connectivity, and user issues; deploy and configure Apple laptops/desktops and Linux systems for incoming School of Natural Science members, and use Drupal to maintain user-facing technical documentation on the IAS website for wireless network connectivity and access.

Rutgers University Public Safety

September 2026 – Present

Community Service Officer (CSO) ipo.rutgers.edu

New Brunswick, NJ

- Conduct overnight patrols, security escorts, and event security operations, maintaining situational awareness and proactively identifying potential safety and security concerns.
- Respond to medical and safety incidents, including alcohol-related emergencies, requiring quick decision-making, composure, and sound judgment in high-pressure situations while coordinating with EMS and RUPD.
- Provide security support for large-scale events, including Rutgers football games, adapting quickly to evolving situations and communicating effectively with officers, university personnel, and the public.
- Operate within a structured command hierarchy, following established protocols and chains of command while developing discipline, accountability, professionalism, and effective teamwork in a public-safety environment.

SKILLS

- Languages: Python, C, Java, SQL
- TCP/IP, Ethernet, Wireless Networking, IPAM, Network Monitoring, NDR, Icinga, Nagios, Plixer
- Technologies: Linux, Git, Drupal, RT
