EDUCATION

Rutgers University - New Brunswick, NJ **September 2024 – Expected May 2028**

Bachelor of Science in Computer Science and Mathematics

- Relevant Coursework: Systems Programming, Computer Architecture, Data Structures, Design & Analysis of Computer Algorithms, Principles of Information & Data Management

EXPERIENCE

Institute for Advanced Study **May 2025 – Present**

Network Engineering Intern ias.edu Princeton, NJ

● Support enterprise network and data center infrastructure across multiple layers of the OSI model, working with fiber optics, Ethernet, switches, servers, UPS systems, wireless access points, IPAM, and network services; utilize Icinga and Nagios for server and network monitoring and maintain a PostgreSQL database tracking thousands of fiber strands across campus.

● Lead the installation and replacement of 300+ wireless access points across campus and residential facilities, coordinating deployments with Facilities, troubleshooting SSID, wireless coverage, and connectivity issues, and supporting network switch replacements and infrastructure upgrades.

● Develop Python scripts for network automation and configuration assurance workflows to automate infrastructure configuration, improve network consistency, and reduce manual processes; contribute and review code through GitLab using version control and collaborative software development practices.

● Investigate cybersecurity incidents and network threats, including phishing emails, SMTP authentication attacks, malicious IP activity, and suspicious network traffic, using Plixer and other network observability/NDR tooling to analyze activity and support incident response.

● Perform security audits and reviews of software code, identify potential vulnerabilities and security issues, write structured security finding reports, and create and track corresponding remediation tickets in GitLab while collaborating with the Software Engineering team.

● Provide cross-functional IT and systems support through the RT ticketing system, troubleshooting printers, endpoints, network connectivity, and user issues; deploy and configure Apple laptops/desktops and Linux systems for incoming School of Natural Science members, and use Drupal to maintain user-facing technical documentation on the IAS website for wireless network connectivity and access.

Rutgers University Public Safety **September 2026 – Present**

Community Service Officer (CSO) ipo.rutgers.edu New Brunswick, NJ

● Conduct overnight patrols, security escorts, and large-event security operations while identifying and escalating potential safety and security concerns.

● Respond to medical and safety incidents, coordinating with RUPD, EMS, and state and federal agencies while exercising sound judgment in high-pressure situations.

● Operate within a structured command hierarchy, following established protocols and chains of command while developing discipline, accountability, and teamwork.

LEADERSHIP

Rutgers University Iranian Student Association **April 2025 – Present**

● Vice President, Former Treasurer

Rutgers University Western Asian Student Council **May 2026 – October 2026**

● Vice Chairman

SKILLS

● Languages: Python, C, Java, SQL

● Networking & Security: TCP/IP, Ethernet, Wireless Networking, IPAM, Network Monitoring, NDR, Icinga, Nagios, Plixer

● Technologies: Linux, Git, GitHub, GitLab PostgreSQL, Drupal, RT
